1. DEFINITION

This formula is for 10-16 year olds and will drive the Nissan K11 Micra on oval circuits all around the country in a non-contact class.

2. WHO CAN RACE

- All 1 litre Hot Rod drivers must apply for a 1 litre Hot Rod licence which costs £60.00 for the year.
- Once registered it then entitles you to pick your race number, subject to availability, and you will be issued with a copy of the 1 litre Hot Rod rules and specifications.
- You may only race if you have pre-booked through the Spedeworth office by calling 01252 322920 or via the website. Bookings will be on a first come first serve basis, so book early.
- Please note that **no** day licences or temporary licences will be issued!
- At a meeting all drivers must book in at the Pit office with their logbook where they will be given an entry ticket for themselves only.
- You cannot register mechanics for this formula
- You must be between 10 and 16 years old to race. A driver must retire prior to their 16th birthday.
- All drivers must pass a ORCi competency test, this will be done at Aldershot Raceway at a cost of £100. Contact 01252 322920.
- ***New drivers must start at the rear of the grid for the first three meetings they attend.***

3. WHAT TO DO NEXT

- Check through the fixture list for the 1 litre Hot Rods.
- Contact the Stock Car office to book an event.

- Bookings are done on a first come first served basis.
- On arrival to the stadium, you must first booking at the Pit office.
- You must then get the car safety checked. A safety check sticker will be issued by the scrutineer which has to be displayed in a prominent position on the car.
- Ensure you are familiar with the raceway flags and rules of racing as you are now ready to race and will come under all the rules and regulations similar of the promotion.

4. ELIGIBLE CARS

- This formula is based round a Nissan K11 Micra, using a 1ltr distributor engine only, leaving it on standard injection system.

5. INITIAL PREPARATION

- Remove all exterior, mouldings screen, glass, lamps and handles.
- Remove all interior, trim, the dash and seats.
- Remove the fuel tank spare wheel, carrier and towbar is fitted.
- Remove all obsolete, wiring and interior debris from the car.
- The plastic front and rear bumpers must remain fitted when the car is raced.
- Read and familiarise yourself with the 1ltr Hot Rod Rules & Regulations for preparing the race car.

6. PERSONAL SAFETY

Drivers are advised that under Health & Safety, they are responsible for their own and their Mechanic's actions. Promoters have had complaints made about Registered Drivers & also Mechanics, consuming large amounts of alcohol at meetings, which could effect their judgement or be detrimental to their health, when medical attention has to be administered by Paramedics, St Johns or Hospital Staff.

Should an incident occur that proves fatal on the raceway and you are involved, it is likely that the Police will want interview you. **If you drive, don't drink!** Scrutineers and Officials will report to the Clerk of the Course, anybody they believe is under the influence of Drink or Drugs.

Drivers whom it is thought are under the influence, may breathalysed. You have been warned!

Flags as used by the Starting Marshall & Trackside Safety Staff.

- Waved Green Flag – Go, the race is on.
- Waved Red Flag – Stop racing, slow down & stop immediately.
- Chequered Flag – Race winner has crossed the line, continue to race until the Red Flag is shown.
- Held Yellow Flag – Beware, you are approaching a hazard on the track, continue to race.
- Waved Yellow – Slow down, hold your position, **and do not** overtake any other cars.
- White Flag with a Blue spot – Oil / debris on the track.
- A Blue Flag – This is shown to a driver who must hold his racing line. You may be holding up another driver who has been trying to pass you but is being baulked, or you are spoiling a race by holding up a pack behind you, by your driving style.

Once shown the flag you must either hold a racing line on the inner part of the track or the outer part of the track, not weave between both. If after two laps you fail to obey this Blue Flag you will shown a Blue & White Fag.

- Blue & White Flag – Give up your track position, you have not taken notice of the Blue flags.
- Black cross on a White board – You have committed an infringement and may be penalised in the results.
- Waved Black Flag - You are disqualified, pull off the track immediately.
- White Flag with Red Cross – Technical Disqualification, leave track immediately

Drivers are also reminded that they should line up on the grid with their engines switched off in the correct points order, unless told otherwise.

7. SAFETY EQUIPMENT

1. CRASH HELMET

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

2. RACING OVERALLS

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

3. GLOVES

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

4. BALACLAVAS

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

5. A NECK BRACE

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

6. WET WEATHER CLOTHING

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

7. 1kg FIRE EXTINGUISHER

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

8. DRIVERS SEAT WITH HEAD RESTRAINT/WINDOW NETS

You must have a Driving Seat with a head restraint and this may be of a competition type. The seat should occupy its original position where possible and be suitably supported at shoulder height and on both of the sides and back, with a suitable framework or seat stiffener's.

Additional wrap around seat support at shoulder height.

You may fit a Head Restraint Net on the on the safety fence side of the race car only. A quick release window net must be fitted to the driver's door window aperture and must be of quick release/cloth type only. Net spacing must be 76mm x 76mm maximum.

If the seat sits behind the b/pillar hoop a secondary support to the cage must be added. An example of this is shown in the diagrams within this section of the document. If the modification goes to the floor it must be sat on 23cm square plate 3mm (min.) thick.

This new section must not be constructed in a way that a drivers helmet can make contact with it.

Material od and thickness as rest of roll cage.

FRONT VIEW

SECONDARY SEAT SUPPORT BARS

9. SAFETY HARNESS

Please visit the ORCi website www.orci.co.uk for current safety equipment regulations.

8. VIOLATIONS

- When referring to the engine, gearbox, final drive, mechanical or construction Rules & Regulations, the principle will always be: *Unless permission is specifically granted to make modifications, (or any variation) nothing may be done to alter or change the Standard Parts in any way.*
- It is the responsibility of the Driver to prove to the Promotion that the part is legal, by way of written proof of where the part originated. This must be undertaken within 7 days, otherwise the item in question will be deemed illegal, resulting in immediate suspension from racing & referral for disciplinary action. **Unless the rules say you can do it, you cannot do it!**
- Presentation of a Vehicle for Scrutineering is a declaration by the entrant that the vehicle is eligible for that event.
- Car engines & fuel will be checked on a random basis. Violations or refusal to allow an engine check will result in an immediate suspension of all racing facilities.
- All Car and Engine Specifications will be taken from either the manufacturers Technical Specifications or the Technical Service Data books as published by Glass's Guide.
- Should a discrepancy occur between the Specifications then the Promotion will exercise its judgement, and that decision will be final.
- Clarification on any one item may be sought from the Promoter.
- Each driver is permitted one car per meeting & each car is permitted one driver per meeting.

9. VEHICLE WEIGHT

- The minimum car total weight is 640kg. ***From the 1st January 2026 this will be increased to 660kg but you will only be allowed a maximum of 20kg of ballast which will have to be split evenly in the same place in the four foot wells and secured by a minimum of 2 bolts in each which will be included as part of the ballast weight.***
- The right-hand side weight is maximum of 54% of the total vehicle weight.
- If you are checked and over the 54% but under 54.5% on your first offence you will lose all points/monies due on the day and receive a final warning & loaded for the day. You must have this written in your log book.
- Anyone over 54.5% on their first check will receive an automatic one meeting ban and loaded immediately with loss of any points or monies due (if applicable).
- If a driver is found over 54.5% on a second occasion the penalty will automatically be doubled, or possibly carry a longer suspension. Checks will be carried out at any time.

Underweight Vehicle Bans	
Car Underweight by:	Banned From Racing For:
0.001kg – 1.0kg	1 month
1.001kg – 2.0kg	2 months
2.001kg – 3.0kg	3 months
3.001kg & over	6 months

10. WHEEL BASE

- Nissan K11 Micra wheel base is 2360mm.
- ~~You can move wheel base to a max of 38mm total difference between both front wheels.~~
- The wheel base can be altered by cutting and welding lower wishbones.
- **Nissan K11 Micra wheel base is 2360mm.**
- **O/S Front wheel base must remain standard.**
- **N/S Front wheel base castor can be extended up to 2385mm.**
- **The wheel base can be altered by cutting and welding lower wishbone.**

11. ROLL CAGE

- **No Alloy roll cage or part cages are allowed. The minimum steel roll cage protection you must have is one front hoop, one rear hoop, one rear hoop cross bar at shoulder height to mount seat support or a seat brace hoop as a seat support, three roof connecting bars, one dash cross bar going across the bottom of the window aperture to a maximum of 5 inches down. Also 1 25mm od or 2 10mm od tube bars from top to bottom bar on roll cage front window. two D/S chicken bars plus two connecting bars, & two P/S chickenbars plus two connecting bars, & minimum 2 rear stay bars to the rear shock towers or floor but must terminate at least 4" from the rear panel (must be either Fig 2 or 2(a)). The lower bar on the drivers side (if horizontal) should be a minimum of 3" (76mm) above the sill bar and then from the bottom door bar to the top door bar must be a minimum of a 3" (76mm) gap. The roll cage hoop feet must be on ~~four welded 23cm square plate 3mm (min.) thick, or~~ a piece of 38 x 38 mm box section or roll cage tube, 2.5mm minimum thickness, connecting front and rear hoop feet welded to sill or floor. This bar will not be classed as a chicken bar. All joints must be welded over 90% of the joint unless as approved RACMSA cage is used. The cage must not protrude through the bulkhead with the following exception. It is permitted to support both turrets from the rollcage with the maximum material and gauge as the roll cage, but the shock absorber must not connect to it. Allbars connected to the cage must be steel. The minimum thickness of the roll cage are 1¼" OD 10swg (3mm) tube 1½" OD 12swg (2.5mm) tube 1½" x 1½" 10swg (3mm) box iron. Front Windscreen bars no more than 5" from window surround. As the weights are increasing from the 1st January 2026 it is compulsory to have sill bars to join the A & B pillars of the roll cage and then the new door bars would weld onto these.**

Corner gusset bars are included in the diagrams to be added as a means to add weight to the car if necessary.

12. BODY SHELL

- Silhouette of the car cannot be altered.
- The doors, rear wings, the boot, the bonnet may have the inner panels removed. The roof lining and rear pillars up to the B pillar may be removed.
- Headlamp apertures may be filled in with metal or fibreglass panels.
- 2025 Bonnett & Boot/Tailgate must be original and not made from fibreglass.
- Rear light aperture must be filled in with steel and must be either welded or bolted in place.
- Original plastic front and rear bumpers must be fitted to the car at all times.
- Bumper Iron replacement must not exceed more than - 25.4mm x25.4mm x1.6mm, 1x1 x 16mm Gauge mild steel only, this is the maximum size and thickness of replacement standard parts.
- Drivers door must open and have a secure fixing, passenger side door can be fixed shut, All doors must be complete.
- Hot rod style aerofoil is permitted.
- Bonnet must be fixed with 4 fixings, can be left on the hinges with two bonnet pins, or 4 bonnet pins in total.
- You must have the minimum of two mirrors one inside the car and one driver-side mirror.
- The bulkhead of the car must be secure and complete to create a firewall between the driver and the engine.
- Wing, Arch, & side Skirt Supports must be tube only 12.7mm x 1.6mm thick, 0.5 inch x 16 Gauge Mild Steel Tube.
- ***All newly built cars from 01/06/2026 must have wheel arches and skirts fitted.***
- ***All other cars in the formula from 01/01/2027 will have to have arches and skirts fitted NO EXCEPTIONS.***

13. SUSPENSION

- Standard replacement shocks only, can be oil or gas pressured but must not be competition or valved in anyway, and must run standard components in a standard shock, Front shockers must be sealed inserts, also front shockers must be the same IE Oil-Oil or Gas – Gas
- ***You may elongate the bottom holes and weld washers to them so they are not adjustable. You may grind the big insert nut on the top of shocker so you can easily fit a 2 ¼ inch spring over it.***

- **No bump stops are permitted on front shock absorbers.**
- Springs are free, must be securely fitted. **Packers may be used underneath or on top of the spring but if on the rear must be securely fixed by wire or cable tie.**
- Camber on both front wheels is free but must not be adjustable apart from rule 13.6 only, You must run standard Nissan K11 Micra driveshaft. **You may fit a washer/spacer in between the end of the half shaft and the hub. The nut that holds the hub to the half shaft must when secure be a minimum of at least being flush with the end of the drive shaft.**
- ~~Passenger side strut top may have holes elongated to gain camber.~~
- **Drivers side front wheel must not have anymore than 3 degrees of positive camber.**
- Rear axle must remain standard, standard length link arms, standard length panhard rod, panhard rod may be strengthened. **You may weld either a piece of tube or box iron to hold the spring in place. However, rear springs must be wired or cable tied in place to prevent the springs coming out. Wire or cable ties being used can only at the top or bottom of the spring and not both positions. You may use nylon bushes on the rear swinging arms also known as poly bushes.**
- ~~Front hubs must remain standard apart from camber gains, no moving steering arms or any other modifications.~~
- Front hubs may be modified in any way to achieve positive or negative camber but must not then adjustable. **Steering arms must not be modified in anyway from the standard manufactured part. The hub may be machined for fitting of the wheel only or the wheel may be modified to fit the hub.**
- **You can use Bilstein B4 OE (Black), KYB, Monroe.**
- **N/S/F wishbone maybe extended by means of welding in metal 25mm x 25mm box to achieve caster and camber. This means 25mm outwards and 25 mm forward and NO TOLERANCE is allowed so it recommended that you stay to underside of measurements.**

14. BRAKES

- Standard brakes only, no rear disc, it must be drums, **No Vented Discs.**
- **No competition brake pads are permitted. Only standard or cross reference from the motor factor.**
- Hand brake must be operational.
- You may remove brave pressure valve on rear.
- **Braided break pipes may be used until the 1st January 2026.**
- Brakes must work on all 4 wheels at all times.
- Must have working brake lights at all times.

15. WHEELS & TYRES

- 13" or 14" wheels up to a maximum of 6j wide.
- The only tyre permitted is the Falcon Sincera SN110 or Falken Ziex ZE310.
- Tyres up to maximum of 185 wide.
- Tyres to minimum profile of 55.
- Same size wheel and tyre across the same axle at all times, No wheel spacers are permitted.
- Road legal tyres only. No semi slick or competition tyres, if you have doubts with tyres please ask before you spend your money.

- Wheel Studs must protrude the wheel nuts.

16. GEARBOX

- From 2025 the only gearbox to be used is the K11 1.0 Big shaft distributor gearbox 1998-2000. 2nd gear 1.82 42-43 teeth.
- Differential 4.47 76 teeth (crown wheel pinion) 17 teeth on pinion.
- Gearbox must have breather pipe going into catch tank.
- You must use standard drive shafts only.
- **Big gearbox only allowed from 1998 to 2000 models please see below the ONLY RATIOS ALLOWED.**
1ST GEAR = 16/49 =3.06
2ND GEAR = 23/42 =1.82
F/DRIVE = 17/76 =4.447
- **NO MIXING OR MATCHING THIS IS WHAT IS PERMITTED NOTING ELSE. NO EXCEPTIONS. IT IS PARENTS RESPONSIBILITY TO MAKE SURE THE CAR COMPLIES WITH RULES AND REGULATIONS.**

17. ENGINE

- **K11 Nissan Micra Engine.**
- **CG10 DE engine up to year 2000.**
- **1 litre 16 valve distributor engine only.**
- **Engine numbers and head numbers must be clearly marked / stamped or the engine will be deemed illegal.**
- **No other variants allowed e.g. Nissan March, Bolero, Cube or Figaro. No Super S models or parts allowed.**
- **No coil pack parts allowed.**
- **No inter-changing of coil pack internals allowed.**
- **Cylinder head can be skimmed.**
- **Minimum head thickness after skimming is 120mm.**
- **Standard head gasket MUST be used.**
- **Only standard Nissan Micra OEM camshaft allowed. No aftermarket cams allowed.**
- **Standard valves and valve springs only.**
- **Valve seat must remain standard.**
- **No changing of valve angle on seat or valve.**
- **3 angle valve seats allowed. 30/45/60 degrees.**
- **No decking of the engine block.**
- **Crankshaft / rods / pistons and all other internal parts must remain standard.**
- **Standard inlet manifold only.**
- **Standard exhaust manifold. The rest of the exhaust is free.**
- **Rev limiter may be removed / blanked off.**
- **Flywheel can be lightened to minimum 6kgs (less bolts).**
- **Only a standard clutch can be used. No lightening.**
- **Fuel rail including injectors and fuel regulator must remain standard.**
- **No porting or polishing of the cylinder head or manifolds.**
- **The wire gauze / mesh must remain in the standard throttle body.**

- You must use the standard air filter box. The inside air filter may be removed.
- No forced induction allowed.
- Standard ECU must be used.
- No ECU modifications or mapping.
- No adjustable ECUs.
- No Nissan March ECUs.
- Engine mounts may be poly bushed.
- There will now be a buying price of £600 this doesn't not include the Inlet, injector rail, throttle body, dizzy, flywheel or clutch. This can only be purchased by a licenced driver who is competing in the event on that day.

Below is an example of an engine check list which can be used by a scrutineer or yourselves to try and help with guidance:-

<u>1ltr HOT ROD ENGINE CHECK LIST</u>	<u>INFO</u>
CG10 DE engine distributor	
Cylinder head cast only (numbers on head 4f1-u). No 41B cylinder heads allowed	
Cylinder head standard thickness / height – 121.20mm. Minimum head thickness after skimming – 120mm	
Standard head gasket minimum 1.20mm thickness	
Valve spring free length 40mm (but will still be pressure tested for poundage)	
Valve guide length 42/44mm	
Valve stem 5.5mm	
Valve head diameter:- Inlet 27.6mm Exhaust 22.66mm	
Valve seat angle 45 degrees	
3 angle valve seats are 30/45/60 degrees 30 degrees (top cut) 45 degrees (main angle) 60 degrees (throat angle)	
Camshaft height inlet 38.195mm	
Camshaft lobe width inlet 32.2mm	
Camshaft height exhaust 38.195mm	
Camshaft lobe width exhaust 32.2mm	
Crankshaft 63mm stroke	
Pistons must be correct for engine 71mm / 71.030mm	
3 piston rings must be fitted	
Correct injectors for engine	

18. OIL CATCH TANK

- A metal type catch tank is compulsory.
- You must run your engine, breather and gearbox breather into this.

19. IGNITION / ECU

- Standard ecu with in manufacture range is allowed. **This may be swapped at a race meeting with another driver. Refusal to agree will result in a 6 month ORCi ban.**
- Any thought to have tampered with their ECU will have it taken away at the end of the meeting and checked for legality.
- Standard distributor, you may remove the rev limiter.

- **NGKBKR5E-11, NGKBKR6E-11, NGKBKR7E-11, NGKBKR8E-11, Denso K16pr-u11**
- **No iridium or race type spark plugs allowed, only the above listed.**

20. FUEL SYSTEM

- Fuel tanks must be metal or FIA approved & fitted behind the driver but in front of the rear axle centre line.
- The tank must have a maximum capacity of 9 litres.
- The fuel tank must be above the floor or rear seat and must not be cut in any way to fit. Four 50mm diameter holes should be drilled for drainage purposes.
- Fuel caps must be of a metal screw type, no push fit types are allowed
- The fuel outlet must be from the top of the tank.
- The tank must have a positive means of fixing.
- A breather pipe must be fitted which should incorporate a one – way valve, with the pipe terminating below the tank so as to prevent spillage if inverted.
- All fuel lines must be inside the car. ~~and be metal or metal covered.~~
- **High pressure fuel feed lines must be used.**
- **You can use standard fuel return lines that are rated for fuel injection pressure.**
- A fuel shut off tap must be within easy reach of the driver
- A complete fire wall must cover the tank.
- Only roadside fuel can be used. No additives are allowed.

21. BATTERY

- Must be fixed securely and have a battery isolator switch on the passenger side of the car.
- Battery must be a standard 063 or 075 & be inside the car & no further forward than the back of the drivers seat on either side of the car.
- **Battery must be covered with a leak proof material to prevent spillage of acid.**

22. INTERIOR MIRROR

- The Interior mirror must be fitted.

23. DOOR MIRRORS

- A Drivers door mirror must be fitted but its mounting must be of a shear or spring loaded type and it must not protrude beyond the extreme body width of the car.
- Maximum mirror size is 152 x 100mm or 6"x4" and if glass, it must be covered in a clear plastic film to stop the glass fragmenting.

24. WINDSCREEN/GLASS

- A mesh panel covering the driver's side of the screen is permitted, but must be fitted in a

way to be easily ripped off IE Cable tied in, A rain deflector maybe used but must be held on by a minimum of 2 bolts.

- No windows are permitted.

25. STOP LIGHTS

- Stop lights must be fitted facing rearwards & can either be two separate lamps, a minimum of 762mm or 30" apart or a centrally fitted strip-light (LED type).
- When two lights are fitted, either from the underside of the tailgate or the top of the parcel shelf, they must be no greater than 21 Watts in Power.
The two lamps must be a minimum of 75mm or 3" & a maximum of 127mm or 5" in size, round or rectangular but they must be a pair.
- Strip-lights must be no wider than 406mm or 16".
- The lights must operate off of a standard brake stop light switch.
- All brake lights must be red.

26. PAINT WORK

- The external appearance of the car must look bright & professional at all times drivers of scruffy looking cars will be told to improve their appearance & may not be allowed to race. If paintwork or dents are not addressed prior to the start of the meeting you will be required to start from the rear of the grid for the first offence. Thereafter, the penalty will be a load-up from the meeting with the exception of if there is more one meeting within a seven day period.
- A maximum of two cars may be painted in team colours or painted to look similar, unless it is required by the Promoter for a particular team event.
- **100%** of the roof must be painted in the correct roof grading colour, unless you are a Superstar or a current Championship holder, when the roof must be painted accordingly. Any signage on the roof does not exempt you from not painting the whole roof.
- Sign writing must be professional and be approved by the Promoter.

27. SUN VISOR

- A Sun visor 165mm or 6" in depth must be fitted with your name written upon it.
- **FROM 01/06/2026 all newly built cars must comply with maximum of 6 inch depth visors.**
- **All other cars in formula must comply with same rule from 01/01/2027.**

28. FIN PLATES

- Fin plates must be fitted above the roof line but they should not be larger than 305mm or 12" by 559mm or 22" wide.

29. DOOR NUMBERS

- The drivers racing number must appear on both sides of the car. The numbers should be 300mm or 12" high x 50mm or 2" wide, on a contrasting background, which must extend a minimum of 50mm or 2" beyond the numbers.

30. SPECIFICATION & RULE CHANGES

The Promotion may at any time make amendments to the Specifications for the following reasons:

- In the interests of Safety
- Reduce costs for the driver
- In areas that are detrimental to the future of the formula
- If an unnecessary advantage has been deemed.

Current registered drivers will be notified automatically of any changes.

The Malcom Girling Rule may only be used on championship races which covert a roof grade e.g. World Championship. This is when a car has deliberately been taken out by breaking the rules of racing within the last 3 laps of the race e.g. a car coming off the infield to stop the leader. If the Steward Of The Meeting decides that the Malcolm Girling has come into effect the result shall go back to when the offence occurred and the leader of the race at that point will become the winner. The Malcolm Girling rule only applies to the driver leading the race.

31. ROOF GRADING

Grades are to be displayed via the car roof fins and not the roof itself.

The fins must be as follows:-

- White Grade – Black numbers on White background
- Yellow Grade – Black numbers on Yellow background
- Blue Grade – White numbers on Dark Blue background
- Red Grade – White numbers on Red background
- Points Champion – Black numbers on silver back ground

The rear of the fin plate must be plain and white in colour. The roof Fin must be above the roofline. The roof of a car may display a championship status providing the driver is the reigning champion e.g. World Champion, Southern Champion. No sign writing is permitted on the roof of the car displaying previous championship history which is no longer current e.g. the 2015 National Champion cannot display the fact of this in 2017.

If you win a race at a meeting; you will start the remaining races from the rear of your grade. Should you win another race at the same meeting – you will be automatically upgraded. Multi-Champions will start next to the National Points Champion.

Red grade drivers will start in points order with the lowest points scorer in attendance within the red grade at the front of the respective pack.

Drivers with the incorrectly shown grade, after the points chart has been issued, will have to start at the rear of the grid.

Grid Line up / Roof Order:

National Points Champion	Silver Roof
National Points Leader	Silver Stripe
Supreme	
Red	
Blue	
Yellow	
White	

All roof grade champions must start from the rear of the grid. The only exception to this rule is where time trials, or specific grid orders, are implemented. Any of the champions, racing together, should start in order, as listed e.g. National Points Champion at the back of the grid, etc.

32. RACE RECEIVER

- All drivers MUST use an official Race Receiver.
- Any driver whose Race Receiver is not working when forming the grid prior to a race will not be allowed to race, unless it can be repaired before the race start.
- It is strongly recommended that you carry a spare battery either in your overall pocket or taped inside your car.

33. TRANSPONDERS

Transponders are compulsory from 1st January 2023. A transponder should be working at all times. They should be fitted 1.8 metres back from the front most position of the car. A hole of at least 6" (150mm) is required in the floor, with the transponder fitted vertically, just below the hole. In the event of a dispute with the transponder result, the Steward of the meeting will make the final decision. Any driver found to have fitted the transponder further forward than the required 1.8 metres will be excluded from the meeting. Transponders can be purchased by calling 01283 575354.

34. DATA LOGGING

- No data logging is permitted.

35. SCRUTINEERING OF NEW CARS

All new cars must be Scrutineered prior to its first meeting. Arrangements must be made with Spedeworth to bring the car along to a Stadium on the day of an event and then your car will be Scrutineered.

Spedeworth will be looking to introduce new car models to the formula and would welcome any suggestions on prospective models with similar BHP figures at the wheels to the cars currently competing in the formula.

Drivers and teams are reminded that a secondary means of supporting a vehicle must be used when working underneath a car that has been jacked up (i.e. axle stands).

Please note that all of the above rules are subject to change in respect of Health & Safety requirements.

REVISED RULES FOR 2026 HIGHLIGHTED IN BOLD/ITALIC/RED PRINT

ITEMS MARKED ~~STRIKETHROUGH~~ ARE NO LONGER ALLOWED
